Designing & Building Automatic Stills

I would build a 3" VM/LM combo still. Cut the 3" up into 24" sections, and use copper triclamp ferrules to join them, so you can get into them easier, and swap out a simple pot still head as needed. Stilldragon is out of stock on these but will have more in a couple weeks. Here is some discussion on the VM/LM design. You can keep your existing ...

Designing & Building Automatic Stills por Riku ...

Shortly after Amphora Society set out to publish Making Pure Corn Whiskey by Ian Smiley, Designing & Building Automatic Stills by a scandinavian author, Riku, and most recently Cordial Waters by Wal Paviuchuk, a detailed history of distilled spirits, containing 260 recipes from all around the world.

Professional Distillers Equipment, Books, & Consulting

'Designing & Building Automatic Stills' by Riku delves deeper into the different types of stills, ingredients and processes that make different types and qualities of liquor.

The reason we can distill alcohol is because it mixes well ...

My name is Riku and I come from the frozen north. I built my first still as a teenager and picked up the hobby again in 2002. I must have built 30+ different stills since and my current rig is IMO a pretty good one. It can turn 25 liters of mash in to 3.2 liters of neutral azeotrope in 5 hours. It also discards heads and tails automatically.
