It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

Hydroponic Food Production

One of the great benefits of hydroponic food production is that we can start with the ideal system that suits our needs and expand or contract its size very easily. For example, we could begin producing hydroponic food in a small, easy to maintain tier of stacked pots that are drip fed via a pump located in the bottom of a bucket.
