A fetus or foetus (/ ' f i: t ə s /; plural fetuses, feti, foetuses, or foeti) is the unborn offspring of an animal that develops from an embryo. Following embryonic development the fetal stage of development takes place. In human prenatal development, fetal development begins from the ninth week after fertilisation (or eleventh week gestational age) and continues until birth.

### Fetus - Wikipedia

Other passages mention a consciousness in this freedom — "without feature or surface, without end, luminous all around" — lying outside of time and space, experienced when the six sense spheres stop functioning ().In this it differs from the consciousness-khandha, which depends on the six sense spheres and can be described in such terms as near or far, past, present, or future.
