The CWI can automatically create to-scale pressure vessel drawings that include assemblies, bills of materials, nozzle details, cut lists and custom Appendix 2 flanges. The heat exchanger drawings generated add details such as tube bundles, U-tube bend schedules, baffles, tie rods, spacer tubes and impingement rods.

Automatic Pressure Vessel, Heat Exchanger and Piping Drawings

This drawing is created in SolidWorks. By default, we use SolidWorks to create vessel drawings unless AutoCAD is specified. The drawing provides all required information to order material, fabricate and inspect without referring to the calculation set - a standard for pressure vessel drawings. Looking for Help?
