Psychologists often define learning as a relatively permanent change in behavior as a result of experience. The psychology of learning focuses on a range of topics related to how people learn and interact with their environments. One of the first thinkers to study how learning influences behavior was psychologist John B. Watson who suggested that all behaviors are a result of the learning process.

But tired of years of speculation, theory and argument, and bearing in mind Aristotle's plea for scientific investigation to support theory, psychology as a scientific discipline began to emerge in the late 1800's. Wilhelm Wundt developed the first psychology lab in 1879. Introspection was used, but systematically (i.e. methodologically).
