I'm replacing the timing belt on a 97 3.0 and I need torque bolt specs for: \*the cam gears \*timing belt tensioner & idler pulley \*water pump bolts \*crankshaft bolt. Is there a torque spec listing on this forum? If so does anyone have the link for it? Thanks

### Torque Specs | Toyota Nation Forum

Anyone have some guidance for me on the water pump torque specs on the 4.0? I keep reading "9-18 ft lbs" which seems like a pretty big spread. Is it possible to pin that down a little closer?

### water pump torque specs? | Jeep Wrangler Forum

89 lb.in that's about 7.5 lb.ft of torque on the first pass. Second pass pump bolts must be tightened an 3xtra 45 degrees more and it's done. Water pump pulley bolts are then tightened to 89 lb.in or 7.5 lb.ft as well and that's all there is to it. I suggest using an accurate 1/4" torque-wrench for this job.

### water pump torque | Dodge Cummins Diesel Forum

I prefer to get the water pump WITH housing, as it is a lot easier to deal with and only costs \$10 more. For the I4 (55FE): Water pump cover to water pump housing: 78 INCH pounds. Not foot pounds. Install the other water pump bolts to the same 78 INCH pounds. Water pump to water bypass pipe (two nuts): 82 INCH pounds. Additional info
